

§ 762.12

(4) Affect natural hazard lands in which the operations could substantially endanger life and property, such lands to include areas subject to frequent flooding and areas of unstable geology.

§ 762.12 Additional criteria.

(a) A State regulatory authority may establish additional or more stringent criteria for determining whether lands within the State should be designated as unsuitable for coal mining operations. Such criteria shall be approved pursuant to subchapter C of this chapter.

(b) The Secretary may establish additional criteria for determining whether Federal lands should be designated as unsuitable for surface mining operations.

(c) Additional criteria will be determined to be more stringent on the basis of whether they provide for greater protection of the public health, safety and welfare or the environment, such that areas beyond those specified in the criteria of this part would be designated as unsuitable for surface coal mining operations.

§ 762.13 Land exempt from designation as unsuitable for surface coal mining operations.

The requirements of this part do not apply to—

(a) Lands on which surface coal mining operations were being conducted on the date of enactment of the Act;

(b) Lands covered by a permit issued under the Act; or

(c) Lands where substantial legal and financial commitments in surface coal mining operations were in existence prior to January 4, 1977.

§ 762.14 Applicability to lands designated as unsuitable by Congress.

Pursuant to appropriate petitions, lands listed in § 761.11 of this chapter are subject to designation as unsuitable for all or certain types of surface coal mining operations under this part and parts 764 and 769 of this chapter.

30 CFR Ch. VII (7–1–02 Edition)

§ 762.15 Exploration on land designated as unsuitable for surface coal mining operations.

Designation of any area as unsuitable for all or certain types of surface coal mining operations pursuant to section 522 of the Act and regulations of this subchapter does not prohibit coal exploration operations in the area, if conducted in accordance with the Act, this chapter, any approved State or Federal program, and other applicable requirements. Exploration operations on any lands designated unsuitable for surface coal mining operations must be approved by the regulatory authority under part 772 of this chapter, to ensure that exploration does not interfere with any value for which the area has been designated unsuitable for surface coal mining.

PART 764—STATE PROCESSES FOR DESIGNATING AREAS UNSUITABLE FOR SURFACE COAL MINING OPERATIONS

Sec.

764.1 Scope.

764.10 Information collection.

764.11 General process requirements.

764.13 Petitions.

764.15 Initial processing, recordkeeping, and notification requirements.

764.17 Hearing requirements.

764.19 Decision.

764.21 Data base and inventory system requirements.

764.23 Public information.

764.25 Regulatory authority responsibility for implementation.

AUTHORITY: 30 U.S.C. 1201 *et seq.* and Pub. L. 100–34.

SOURCE: 48 FR 41351, Sept. 14, 1983, unless otherwise noted.

§ 764.1 Scope.

This part establishes minimum procedures and standards to be included in each approved State program for designating non-Federal and non-Indian lands in a State as unsuitable for all or certain types of surface coal mining operations and for terminating designations.

§ 764.10 Information collection.

The information collection requirements contained in §§ 764.21 and

Surface Mining Reclamation and Enforcement, Interior

§ 764.13

764.25(b) have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance number 1029-0030. The information required in § 764.21 is necessary to allow the regulatory authority to develop a data base and inventory system to evaluate whether reclamation is feasible in areas covered by petitions. The information required in § 764.25(b) is necessary to allow the regulatory authority to determine, when a permit application is filed, whether it includes any areas designated as unsuitable for surface coal mining.

§ 764.11 General process requirements.

Each State shall establish a process enabling objective decisions to be made on which, if any, land areas of the State are unsuitable for all or certain types of surface coal mining operations. These decisions shall be based on competent, scientifically sound data and other relevant information. This process shall include the requirements listed in this part.

§ 764.13 Petitions.

(a) *Right to petition.* Any person having an interest which is or may be adversely affected has the right to petition the regulatory authority to have an area designated as unsuitable for surface coal mining operations, or to have an existing designation terminated. For the purpose of this Action, a person having an interest which is or may be adversely affected must demonstrate how he or she meets an "injury in fact" test by describing the injury to his or her specific affected interests and demonstrate how he or she is among the injured.

(b) *Designation.* The regulatory authority shall determine what information must be provided by the petitioner to have an area designated as unsuitable for surface coal mining operations.

(1) At a minimum, a complete petition for designation shall include—

(i) The petitioner's name, address, telephone number, and notarized signature;

(ii) Identification of the petitioned areas, including its location and size, and a U.S. Geological Survey topo-

graphic map outlining the perimeter of the petitioned area;

(iii) An identification of the petitioner's interest which is or may be adversely affected by surface coal mining operations, including a statement demonstrating how the petitioner satisfies the requirements of paragraph (a) of this section;

(iv) A description of how mining of the area has affected or may adversely affect people, land, air, water, or other resources, including the petitioner's interests; and

(v) Allegations of fact and supporting evidence, covering all lands in the petition area, which tend to establish that the area is unsuitable for all or certain types of surface coal mining operations, pursuant to specific criteria of sections 522(a) (2) and (3) of the Act, assuming that contemporary mining practices required under applicable regulatory programs would be followed if the area were to be mined. Each of the allegations of fact should be specific as to the mining operation, if known, and the portion(s) of the petitioned area and petitioner's interests to which the allegation applies and be supported by evidence that tends to establish the validity of the allegations for the mining operation or portion of the petitioned areas.

(2) The regulatory authority may request that the petitioner provide other supplementary information which is readily available.

(c) *Termination.* The regulatory authority shall determine what information must be provided by the petitioner to terminate designations of lands as unsuitable for surface coal mining operations.

(1) At a minimum, a complete petition for termination shall include—

(i) The petitioner's name, address, telephone number, and notarized signature;

(ii) Identification of the petitioned area, including its location and size and a U.S. Geological Survey topographic map outlining the perimeter of the petitioned area to which the termination petition applies;

(iii) An identification of the petitioner's interest which is or may be adversely affected by the designation that the area is unsuitable for surface
